

Our Commitment:

我们的承诺:

We provide the best wealth protection possible against the three systemic risks of Counterparty, Currency and Jurisdiction while providing excellent storage facilities, reliable testing, strong insurance and deep buy/sell liquidity for bullion.

我们为金银提供最佳的保护，来抵御交易对手、货币和司法三大系统性风险，同时提供卓越的存储设施、可靠的检测技术、强大的保险方案和深度的买卖流动性。

BULLION PROCUREMENT AND LIQUIDITY:

金银采购和流动性:

Making a Market beyond the Financial System

建立金融体系之外的市场

Orders for storage or local delivery can be submitted 24/7 through our secure online platform. Our 180,000 ounce bullion inventory is published online and transparently priced in near real-time.

存储或本地配送的订单可通过我们的安全在线平台全天候提交。我们在网上公布18万盎司的金银库存，并进行实时透明化定价。

We also provide physical liquidity when you are ready to sell and have some of the highest buyback rates in the industry.

当您想要出售并享有业内最高回购率时，我们将为您提供这样的流动性。

All bullion traded, transferred and stored is from internationally recognized refiners or mints and $\geq 99.9\%$ pure earning it the Singapore **Investment Grade Precious Metal (IPM)** classification which exempts it from taxation in Singapore.

所有交易、转让和存储的金银均来自国际公认的精炼厂或铸币厂，纯度 $\geq 99.9\%$ ，属于新加坡**投资级贵金属 (IPM)**，从而在新加坡免税。

BULLION AUTHENTICATION:

金银检测:

Providing Material Certainty

提供坚实的可靠性

Although crude counterfeits can be easily identified, our concern are secondary market advanced counterfeits involving thickly gold plated bars containing tungsten cores, or even ceramic alloy silver coins.

虽然粗制滥造的仿冒品很容易被识别，但我们担心的是二级市场的高级仿冒品，包括镀厚金的钨芯棒，甚至是陶瓷合金银币。

To provide authentication certainties, in 2012, we developed **DUX**, a testing methodology that reliably verifies bullion without damaging them.

为了提供检测的可靠性，2012年，我们开发了**DUX**，这是一种能够较准确地鉴定金银而不损坏它们的检测方法。

DUX is an acronym that stands for Density, Ultrasound and X-ray Fluorescence testing. Each test measures and compares a different physical characteristic in such a way that even the best counterfeits would fail at least one of the three tests. In 2014 we added ECM as an alternative/complement to Ultrasound.

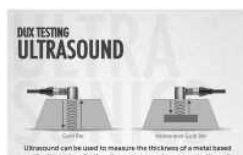

DUX是密度、超声波以及X射线荧光检测的缩写。每一项检测都会测量和比较贵金属不同的物理特性，即使是最高级的仿冒品也无法通过全部三项检测。2014年，我们增添了ECM（电导性检测）作为超声波检测的替代/补充项目。

All DUX test result data is uploaded into a bullion product tolerance database, which records and evaluates the test data. Test results are then retrievable online and are either linked to specific bars (parcels) or, for non-storage testing, specialized tamper evident stickers are used to mark the tested sample.

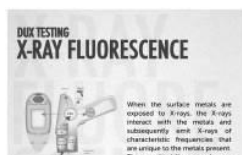

所有DUX检测结果数据都会上传至Silver Bullion商品公差数据库，该数据库主要用来记录和评估测试数据。检测结果可以在线读取也可以链接到特定的金银条（包裹）上。对于那些非存储商品，在实施完检测之后，会在样本上贴上特制防篡改标签。

SECURE STORAGE:

安全存储:

Leveraging Singapore Protections, free of middlemen

利用新加坡的保护，没有中间商

The Safe House (TSH) is our vault and DUX testing facility in Singapore. TSH provided us with massive storage capabilities, eliminated middlemen and removed the inherent regulatory exposure that comes with storing at large Western headquartered vaulting companies.

The Safe House (TSH) 是我们在新加坡的保险库和DUX检测设施。TSH为我们提供了巨大的存储空间，剔除了中间商，并消除了通过西方存储公司保管时其所处地区的监管约束。

1,000 oz Silver Bars being Sealed in a Pallet Cage at The Safe House

Thereby providing:

从而提供:

- Exclusive Singapore Jurisdiction

新加坡专属司法管辖

All storage activities fall under exclusive **Singapore jurisdiction** and we have no customer reporting requirements.

我们的所有存储活动都在**新加坡专属司法管辖**内，且没有客户报告要求。

- End to End Solution

端到端的解决方案

We eliminated all middlemen and therefore you are not dependent on the solvency or regulatory exposure of third parties.

我们剔除了所有中间商，因此您不依赖于第三方偿付能力或其所处地区的监管约束。

- Optimal Insurance

最优保险

Bullion stored at The Safe House is covered by one of the **most comprehensive insurance policies** in the industry

存放在The Safe House的金银将获得业内**最全面的保险保障**。

- Secure Storage Options

安全存储服务项目

- Parcel Ownership (S.T.A.R.) - See **S.T.A.R. Storage** for details.

包裹所有权 (S. T. A. R.) - 详情见**S. T. A. R. 存储**。

- Safe Deposit Boxes (SDB) - See **Safe Deposit Boxes** for details.
